To Whom It May Concern:

Re: Mr. Allan Browning

I have personally known and worked with Allan for almost 20 years. He has always provided the highest level of service and expertise regarding IT services, equipment acquisition, advices and direction both professionally and personally.

My company deals with many educational, public, military and government agencies. As such, we are held to a very high standard in all aspects of our operations. These standards extend to our vendors. Our company has had its network upgraded twice by Allan and his company. The last upgrade was a migration from Windows 2000 to Windows 2008 and included both a new Primary Domain Controller and an email server which brought our extensive list of email accounts and services in-house and will provide a great cost savings. The upgrade also included a transition to Gigabit networking.

Allan is always willing to help track down issues and concerns and resolve them quickly. I appreciate working with him and highly recommend him.

Please feel free in contacting me with any questions,

Sincerely,

Chris Fries

Vice President / General Manager
